

## **The payment for document registration**

Under the State Research Institute Centre for Innovative Medicine (IMC) Director's order No. 9 of January 14, 2026, a registration payment is required when submitting the application and enrolment documents for doctoral studies – **50 €**.

The review of the admission documents and all admission procedures begin once IMC receives, together with the other documents, a document confirming the payment of the document registration fee (a bank transfer statement).

The payment for document registration could be paid by another legal or natural person instead of the entrant, but it is necessary to correctly indicate the payment information – the payer and the name of the payment.

After the application for permission to participate in the entrance contest for doctoral studies has been registered, the payment for the document registration is not refundable.
